**\* Call for Pricing, Shapes, and Availability if not represented in above chart.**

**NOTE: Not all colors are available in all products. Colors shown in this chart are available only from the Las Vegas, Nevada, manufacturing plant.**

**Color Variations**

As in all natural materials, color in paving stones has inherent variations. Paver color is affected by the variances in the raw materials, concrete mixture moisture content, climatic conditions, and other variations. Therefore, the colors shown are approximate representations of Pavestone’s paver colors but should not be expected to be an exact match of what will be delivered.

**The Nature of Efflorescence**

Another cause of color variation in pavers may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

#### Color Variations

As in all natural materials, color in wall stones has inherent variations. Wall color is affected by the variances in the raw materials, concrete mixture moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of Pavestone's wall colors but should not be expected to be an exact match of what will be delivered.

#### The Nature of Efflorescence

Another cause of color variation in walls may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.
